

NEHTA – The current and future mission

- Development of the foundations required to enable e-health
- Coordination of the priority e-health solutions
- Adoption of e-health through engagement and collaboration
- Advancement of e-health in Australia

NEHTA is the lead organisation supporting the national vision for e-health in Australia; working openly, constructively and collaboratively with consumers, providers, funders, policy makers and the broader healthcare industry; to enable safer, higher quality, accessible, equitable, efficient and sustainable healthcare.

NEHTA was established by the Australian Commonwealth, State and Territory governments in 2005 to develop better ways of electronically collecting and securely exchanging health information.
